

# QFR Pay per Use Model

QFR is Medis' proprietary solution delivering image-based functional assessment of coronary obstructions from standard coronary angiograms.

Integrated into Medis' best-in-class QAngio XA® 3D (3D QCA) application, QFR employs advanced computational fluid dynamic principles to perform a complete physiologic assessment of a coronary arterial segment in the cath lab in under 5 minutes.

By using the QFR Pay per Use Model, you only pay for what you use.

## WHAT IS PAY PER USE?

- A license model where you pay for each patient examination receiving QFR analysis

## WHY USE IT?

- Instead of purchasing the QFR product for a fixed period of time, you only pay for the patients being analyzed. This way, the cost of the analyses can be handled very similar like other medical devices such as catheters.

### HOW DOES IT WORK?

You purchase a voucher with a number of QFR analysis tokens. For each patient being analyzed, one token will be consumed from the voucher, and you will be allowed to do unlimited number of QFR analyses on the same patient examination. Once the tokens are used up, you can buy more to suit your needs. You will be able to review the detailed information of the patients that have been analyzed with the pay per use voucher.

### HOW TO OBTAIN QFR VOUCHERS?

Request more information from your sales contact at Medis.

### WHAT ABOUT INSTALLATION?

Vouchers install the same as normal licenses, from a file that can be exchanged via email. You will get instructions from the Medis support team on how to install your voucher.

## HAVE A LOOK AT THE QFR VOUCHER SYSTEM!

#### Legal Statements

Residual Vessel QFR is not available to US customers. Medis and QFR are registered trademarks of Medis Associated BV. QFR is delivered by Medis in a strategic collaboration with Pulse Medical Imaging Technology (Shanghai) Co., Ltd.
