

Test Specialist

Who are we?

At Medis we believe in empowering medical professionals with our innovative analytical solutions. For more than 30 years cardiologists, radiologists, researchers and industry partners worldwide rely on Medis post-processing software, resulting in customers in more than 40 countries. Our team of professionals take great pride in providing innovative cardiovascular imaging solutions that supports our customers' diagnoses and treatment options.

We provide medical professionals with worldwide support, so that together we can improve patient's quality of care.

Our headquarters is in Leiden, but over the years we have established subsidiaries and branch offices in the USA, Japan, United Kingdom, as well as distributors and local agents in multiple countries.

What will your role be?

Medis is a fast-growing international operating organization with national and international employees from all over the world.

The role of a software test specialist is to coordinate the process for analyzing software programs. This process will involve creating and implementing testing methods, recording the test results, and providing recommendations to improve software programs based on the results. Within Medis the Software Test specialist needs to ensure that the portfolio of products is tested continuously and in an efficient (Agile) way, automated where possible, capture evidence of test coverage according to regulatory standards and ensure that Medis software test process is compliant with applicable European standard (CE MDD, ISO 9001 and ISO 13485). All Medis products need to be tested for compliance with the functional requirement.

The profile we are looking for:

- Bachelor or Master degree in engineering or computer science.
- Knowledge of and experience with modern software development methodologies (e.g. Agile, Scrum).
- Experience with testing methods (e.g. TMAP) and tools.
- Experience with test automation.
- Experience with writing test cases.
- Experience with CI/CD.
- Preferably some experience in programming / scripting.

Personal Skills and competences:

- Very strong analytical skills.
- Strong communication skills.
- Committed and pro-active.

- Able to strike the balance between quality improvement and test process efficiency.
- Excellent written and spoken English and preferably Dutch.

What Medis offers you:

- An attractive compensation plan
- International, and diverse colleagues
- Personal growth and development plan
- Working for a company that makes a difference
- A stimulating work environment with highly educated professionals, working on innovative products
- A position in a field with significant growth potential and high societal relevance
- A market-conform salary including attractive secondary conditions
