

**We are looking for a**

## **Analyst Medical Images**

### **Who are we?**

At Medis we believe in empowering medical professionals with our innovative analytical solutions. For more than 30 years cardiologists, radiologists, researchers and industry partners worldwide rely on Medis post-processing software, resulting in customers in more than 40 countries. Our team of professionals take great pride in providing innovative cardiovascular imaging solutions that supports our customers' diagnoses and treatment options.

We provide medical professionals with worldwide support, so that together we can improve patient's quality of care.

Our headquarters is in Leiden, but over the years we have established subsidiaries and branch offices in the USA, Japan, United Kingdom, as well as distributors and local agents in multiple countries.

### **What will your role be?**

In this role you will be responsible for reviewing the results of customers as they achieve their QFR certification. QFR is an innovative Medis product that is used in interventional cardiology to decide whether a narrowing in a coronary artery needs to be treated or not. Users need to be QFR-certified, before they are allowed to use our product. In addition you will be supporting the team with other image-related tasks, like annotations of data sets.

### **Key Responsibilities:**

- To check QFR analyses, correct these and provide responses to participants in the QFR certification process;
- To carry out Quality Assurance on medical images, in particular QFR, and analysis files received from individual users or sites around the world;
- To annotate medical images with the highest quality and efficiency for Medis Applied Research Deep Learning activities;
- To carry out tests on new algorithms/proof-of-concepts for Applied Research projects

### **The profile we are looking for:**

- Higher education or university degree in biology, medicine or other related disciplines;
- All other required knowledge for the role will be trained in-house;

- One or two years of experience in the medical field is an asset;
- Experiences from previous employment that can be used in this setting

**Personal Skills and competences:**

- Committed and pro-active.
- Accurate, reliable, attention to details.
- Ability to work on multiple projects in parallel and complete them properly and in time.
- Excellent written and verbal communication skills (Dutch and English).
- Well organized with ability to work independently and in teams.
- Enthusiastic team player.
- Interested in training aspects.
- Willingness to attend courses

**What can Medis offers you:**

- An attractive compensation plan
- International, young and diverse colleagues
- Personal growth and development plan
- Innovative, highly relevant products that make a difference
